UWB

● 11,934 students

● 9 faculties, 4 research centres,
2 university institutes

● 310 study programmes

● 519 international
partner institutions

● Kulturka – clubhouse and
coworking in the city centre

● 5 university
library sites

● 10 dormitories, 2 canteens,
4 snack bars and 4 cafes

● more than 70 scientific, research,
and development teams

UWB outside the lecture halls

● **Days of Science
and Technology**

this interactive exhibition
turns the centre of Pilsen
into a science laboratory
for two days

● **Czech European
Researchers' Night**

pan-European science
and technology festival

● **Summer schools**

if you don't want to leave
the campus, it's alive
even during the holidays;
you can choose from art,
language or technically
oriented summer schools

● **Job Fair**

students can network
with potential employers

● **Year One**

a festival to help every fresher
feel at home at the University

● **Bandage Battle
of the Bands**

competition and festival of
student bands

● **Hockey Battle of Pilsen**

hockey duel between the
University of West Bohemia
and the Faculty of Medicine
of the Charles University

● **Student Ball**

the largest student social event

● **University Vampires**

voluntary blood donation

Why study at the University of West Bohemia (UWB)?

Students have a chance to build their own study programme according to their interests in an international environment with experts from abroad, get excellent language training, study abroad on exchange programmes and internships, get involved in research, and put their knowledge to the test thanks to close links between University studies and research and practice.

Study programmes

The University of West Bohemia is a public university that offers a wide range of study programmes in both Czech and English. Those who wish to improve their level of Czech or English can prepare themselves for studies by attending our preparatory language courses. UWB also offers double-degree programmes, which allow you to earn a degree at two universities/faculties at the same time.

Higher education institutions in the Czech Republic offer accredited degree programmes at 3 levels:

- Bachelor's (Undergraduate) 3–4 years
- Master's (Postgraduate) 2 years
- Doctoral (Postgraduate) 3–4 years

Studies in the Czech language are free of charge. If you wish to study in English, the fee for an academic year is 3000–4000 € depending on the faculty (approx. 3600–4800 USD, does not apply to the Faculty of Applied Sciences) and is due before a student's enrolment in the University at the beginning of the academic year. The fee covers courses, consultations, examinations and access to the University libraries. Students with excellent results can gain a scholarship.

International Office

The development of worldwide cooperation is one of the University's priorities. The International Office is a centralised University division managing international activities and links, counselling on study and work placement opportunities abroad and taking care of international students, trainees, etc.

Exchange programmes and internships

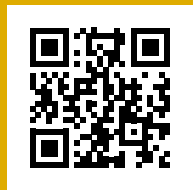

Due to intensified cooperation and long-term bonds with universities all over the world, the University of West Bohemia offers its students not only a wide range of accredited degree programmes but also a broad variety of exchange programmes and professional internships abroad.

- **Short Study Stays** – We accept international students within the Erasmus+ programme and also within other national or international programmes and partnerships for 1 or 2 semesters.

If you wish to study at the UWB as an exchange student, you must be officially nominated by your current university. You will be given instructions on how to register online after your nomination. You will also complete a Learning Agreement and a list of the ECTS courses you will study at the UWB. Scan the QR code for the ECTS course offer for exchange students:

- **Internships** – Our faculties accept international students for internships within the Erasmus+ programme and also within other national or international programmes and agreements for one or more months.

Price	~2,800 EUR	~5,200 EUR	~9 200 EUR

PRACTICAL INFORMATION

Entry requirements

Applicants for study at the UWB should complete and submit an online application form and the following documents.

Online application form:

Complete and send by the deadline for submission of applications. Please make sure to contact the International Office or desired faculty about the deadlines.

Documents to be delivered to the Student Affairs Office of the faculty by the given deadline:

- certified copy of previous education¹
- copies of all other diplomas and qualification certificates obtained
- document or confirmation of English or Czech language knowledge²

All documents must be submitted in English or as a verified translation into Czech.

1. Certified copy of previous education

Graduates from foreign schools and universities who wish to use their qualifications in the Czech Republic must have their foreign degrees officially recognised, depending on the level of degree obtained, either by Czech regional/city authorities or a Czech university that offers an identical/similar study programme.

The UWB also has an institutional accreditation, which offers the possibility of recognition of your previous education within the admission procedure to some of its faculties. Such a recognised education applies only to the particular faculty.

Please make sure to contact your faculty about the deadlines and regulations for providing the documents recognised either by the faculty or by Czech officials, as the conditions may vary.

2. Language proficiency

The majority of faculties at the UWB require at least a B1/B2 Czech or English language certificate from international students interested in bachelor's, master's or doctoral study programmes. To receive more information on levels, certificates, application deadlines and language testing opportunities at the UWB, please contact the administration of the desired faculty.

Please note that Czech and English tests/qualifications normally need to have been taken within two years before your programme starts.

Admission procedure

Study terms and conditions of application procedures to your desired major/faculty are available on the webpage of each faculty under the part Studium/Study.

- **Fill in an electronic application form before the given deadline**, pay administrative fees and file all the required documents to the faculty officials.
- **Go through the application process.** It may be necessary to pass entrance exams (or an entrance interview) to study in certain faculties/majors. It is important to check both post and personal email regularly, following the instructions and deadlines.
- **Apply for a long-term visa / long-term residence permit** when admitted. If you pass through the stages of the application procedure successfully and receive a positive reply from your faculty, it is very important to file the paperwork for the long-term visa / long-term residence permit for the purpose of studies immediately. In this case, the University of West Bohemia will provide you with the necessary paperwork required for the visa office.

Accommodation

Living expenses

Student life

Accommodation and meals

Accommodation is available for all international students at the University's own dormitories. Prices vary depending on the room type: single/double/triple bedrooms. All dormitories have fitted kitchens with facilities for self-catering. Students can dine at the University canteen.

Approximate living expenses in Pilsen

- Accommodation at the UWB From 125 €/month
- Dining at the UWB Canteen 2-5 €/meal (students)
- Public Transport 11 €/month (students)

Student life

The University has a number of student clubs and organisations that are actively involved in the everyday running of the University. They also organise various cultural events and help students spend their free time and prepare them for their future professional life.

Pilsen

- Fourth largest city in the Czech Republic (180,000 inhabitants)
- World-famous traditions of mechanical engineering (e.g. the Skoda engineering works)
- Rich architectural heritage (St. Bartholomew's Cathedral, City Hall, Jewish synagogue, etc.)
- Good location of the city gives a great opportunity to discover the continent
- Safe place to live (Czech Republic is among the top 15 safest countries in the world)
- Reasonable living expenses
- Four rivers and a lively river walk
- Parks everywhere you look
- Cafes with atmosphere
- Sports and beautiful nature
- International theatre festival
- Finale Film festival
- Cultural zone DEPO2015
- Multi-genre summer festival Živá Ulice
- World-famous lager
- Indians = excellent hockey
- Viktorka = great football
- The largest pub in the country (in the brewery complex)
- The tallest church tower in the Czech Republic (102.26 m)
- The largest synagogue in the Czech Republic (the third largest in Europe and the fifth in the world)
- The first city in the Czech Republic to build a completely new theatre after 1989
