

Dobřany, 15. 8. 2021

Dear Mr. Zetek,

An invitation is hereby extended to attend the forthcoming "Project AMNET" event, scheduled to take place **on October 5, 2021, at the TU Cham campus**. Your expertise and experience in the field of 3D printing would be of significant benefit to us and our participants.

The main objective of the Project AMNET is to create a functional and sustainable network for knowledge and technology transfer in the field of additive manufacturing (AM) in the Czech-Bavarian region. This network will enable the regional industry to build important added value. The project will open up new opportunities for its participants to develop and innovate on their own, which is important in today's complex situation. The direct transfer of knowledge and technology in the field of AM that the project will initiate and support will help to establish sustainable cooperation between companies and research organisations. Project AMNET is co-financed by EU.

This event will focus on additive manufacturing in the Czech-Bavarian region, and your presence would greatly enrich the discussion and contribute to a deeper understanding of this innovative technology using a specific functional example. We would be very honored if you could contribute with your presentation and share your knowledge and experience.

We kindly request your feedback regarding your potential attendance at this event. Do not hesitate to contact us for further information via email or phone ([katerina.podana@klastrmechatronika.cz](mailto:katerina.podana@klastrmechatronika.cz), +420 777 085 704)

We are looking forward to your positive response.

Kind regards,

Kateřina Podaná

Cluster Manager
